DOCUMENT GOVERNANCE

Document Control & Navigation

Document Purpose

This document provides comprehensive academic and technical documentation for the PathSeeker Career Passport platform, covering system scope, user experience with high-resolution visual evidence, data models, APIs, and SRS traceability.

Authority Order

- 1. PathSeeker_Career_Passport_SRS_Clean.md (Governing Requirements)
- 2. Verified Source (Project/frontend & backend1)
- 3. Automated Test Evidence (47 passing automated tests).

Table of Contents

01	Document Control & Reading Guide	02
02	Executive Summary & Core Value	03
03	Problem Definition & Target Personas	04
04	Persona Journey: Alex's Pathway from Confusion to Direction	05
05	System Architecture & Technology Stack	06
06	Complete Product Map: 16-Screen System Overview	07
07	Product Walkthrough: Welcome, Authentication & Onboarding	08
08	Product Walkthrough: Personalized Dashboard & Career Passport	09
09	Product Walkthrough: Assessment Quiz & Recommendations Engine	10
10	Product Walkthrough: Career Bank, Deep Detail & Skill Simulator	11
11	Product Walkthrough: Curated PDF Resources, Media & Saved Notes	12
12	Product Walkthrough: Community Stories & Feedback	13
13	Product Walkthrough: Navi Assistant & Voice Guidance Mode	14
14	Product Walkthrough: Admin Control Center & Workspaces	15
15	Mobile Experience & Accessibility Engineering	16
16	Data Architecture & MongoDB Domain Model	17
17	Career Intelligence & Deterministic Scoring Formulas	18
18	API Catalogue & Security Controls	19
19	Why PathSeeker Stands Out: Technical & Architectural Differentiators	20
20	Test Evidence & SRS Requirement Traceability Matrix	21
21	Installation, Deployment & Evaluation Sign-Off	22

PRODUCT VISION

Executive Summary: From Confusion to Direction

PathSeeker is a modern full-stack Career Passport web application designed to guide students, graduates, and professionals from career uncertainty to confident, evidence-based career decisions.

21+

Responsive Web Screens

15

Sourced BLS Careers

6+6

PDFs & Expert Media

47

Passing Automated Tests

The Challenge

- Fragmented Information:** Job market facts, salary statistics, and courses are scattered across opaque portals.
- Black-Box Advice:** Existing guidance engines give arbitrary job titles without explaining *why* a role matches.
- Skill Blind Spots:** Learners don't know the exact skills required to bridge the gap to their target roles.

The PathSeeker Solution

- Durable Career Passport:** Captures archetype, normalized trait signals, and verified profile skills.
- Explainable Compatibility & Readiness:** Separate scores for intrinsic fit vs. immediate skill preparation.
- Interactive Simulator:** What-if skill growth modeling without mutating underlying records.
- Integrated Content:** Direct access to 51 pages of PDF guides and curated Google Career Certificates videos.

DETERMINISTIC

Auditable Intelligence
Scoring formulas are mathematical and version-locked on the server; zero hallucination.

ACCESSIBLE

Inclusive by Default
Theme switching, 85–130% font scaling, reduced motion, and complete keyboard navigation.

HUMAN-CENTERED

Navi Guidance
Contextual assistant supporting voice and text mode for intuitive navigation and exploration.

CONTEXT & USER RESEARCH

Target Personas & Boundary Model

SUPER ADMIN

Sarah Malik
Stage: Platform Administrator
Credentials:
admin@pathseeker.local · PathSeeker-Demo-2026!
Profile: Master administrator with catalog curation, user role governance, and audit inspection.

STUDENT

Alex Morgan
Stage: Undergraduate (Psychology, Karachi)
Credentials:
demo.student@pathseeker.local · PathSeeker-Demo-2026!
Profile: Exploring people-centered tech careers, seeking clear skill prerequisites and role clarity.

GRADUATE

Zara Noor
Stage: CS Graduate (Lahore)
Credentials:
demo.graduate@pathseeker.local · PathSeeker-Demo-2026!
Profile: Building practical full-stack skills and identifying bridge competencies to land entry dev roles.

PROFESSIONAL

Daniel Kim
Stage: Finance Professional (Islamabad)
Credentials:
demo.professional@pathseeker.local · PathSeeker-Demo-2026!
Profile: Transitioning to Data Analytics, evaluating remote salary benchmarks and certification ROI.

Actor Model & System Capabilities

ACTOR	AUTHENTICATION	CORE RESPONSIBILITIES & CAPABILITIES
Visitor	Anonymous	Browse welcome page, inspect public career library, explore PDF resources, engage public Navi intro.
Learner / Student	Authenticated User	Complete onboarding, take quiz, view Career Passport, simulate skill growth, save bookmarks/notes, submit stories & feedback.
Content Editor	Staff Role	Create and edit occupational profiles, manage PDF resource files and expert media URLs, draft quiz questions.
Support & Moderator	Staff Role	Review community success story submissions, triage feedback, write responses, manage help center articles.
Administrator	Super Admin	Manage user accounts and roles, toggle maintenance mode, publish immutable quiz versions, inspect audit logs.

Ethical AI & Safety Boundary: PathSeeker provides educational career recommendations based on U.S. BLS statistical data (2024–2034). It is not an employment guarantee, licensing certification, or legal counseling service.

END-TO-END USER EXPERIENCE

Persona Pathway: From Uncertainty to Career Clarity

Following student persona **Alex Morgan** (Undergraduate Psychology Student) through the entire PathSeeker lifecycle, demonstrating how abstract requirements translate into concrete user empowerment.

STEP 01 /onboarding	Guided Onboarding Wizard Alex selects stage <i>Undergraduate</i> , selects primary interests (<i>Human Behavior, Design, Technology</i>), and rates initial baseline skills (Figma: 3/10, Research: 5/10).	Stage Saved Profile Baseline Set
STEP 02 /quiz	Interest Assessment & Snapshot Creation Alex completes the 8-question adaptive assessment. Backend creates an immutable snapshot locking question weights and response tokens for auditability.	8 Answers Attempt #1 Frozen
STEP 03 /passport	Career Passport Archetype Awarded Deterministic engine calculates trait vectors: Artistic (85%) & Investigative (80%). Awards the "Insight Explorer" archetype with a 71% profile evidence signal.	Insight Explorer Evidence Score: 71%
STEP 04 /recommendations	Explainable Top Match: UX Designer Algorithm computes 94% Compatibility (deep trait fit with empathy + analytical problem solving) alongside 48% Technical Readiness	94% Fit / 48% Ready Top Match Ranked #1
STEP 05 /careers/ux-designer	Skill Gap Breakdown & Target Setting System automatically extracts priority gaps: Figma (Current 3 → Target 8, Gap -5), Prototyping (Current 2 → Target 7, Gap -5), User Research (Current 5 → Target 7, Gap -2).	Priority Gaps Figma & Prototyping
STEP 06 /resources	Curated PDF Guide & Expert Media Study Alex reads the <i>"Tech Resume & Portfolio Builder"</i> (8-page PDF) in the built-in reader and watches Google's <i>"A Day in the Life: UX Designer"</i> video.	Workbook & Video Direct Learning Linked
STEP 07 /careers/...#sim	Interactive Skill Simulation ("What-If" Modeling) Alex slides Figma from 3 → 8 and Prototyping from 2 → 7. The simulator recalculates readiness from 48% → 86% instantly without altering database records.	Readiness: 86% Stateless Simulation
STEP 08 /saved	Action Plan, Bookmarks & Personal Notes Alex bookmarks UX Designer and writes a private learning note: <i>"Target Google UX Certificate sprint by Oct 2026"</i> . Weekly target set on Dashboard.	Goal Saved Active Roadmap Set

FULL-STACK DESIGN

Layered MERN Architecture & Request Flow

[Client Layer] React 18 + Vite (SPA) — TanStack Query v5 (Server Cache) — Zustand (UI/Preferences)
| (HTTP JSON API + HttpOnly Cookie Auth)

[API Gateway] Express.js — Helmet — CORS Allowlist — Rate Limiters — Context / Logging
| (Controller Layer — Input Validation — Session Middleware)

[Domain Services] AuthService · PassportService · RecommendationEngine · CatalogService · Moderation
| (Mongoose ODM Models & Schemas)

[Data & Storage] MongoDB 7+ (Indexed Collections) + Local Upload Storage + Vapi Voice Webhooks

Frontend (Vite + React)

Modular component system, React Router 6, TanStack Query for data fetching, React Hook Form with Zod validation, responsive CSS tokens.

Backend (Node + Express)

RESTful API architecture, layered controller-service pattern, bcrypt password hashing, cryptographic token generation, comprehensive error handling.

Database (MongoDB)

27 Mongoose models, compound text & unique indexes, time-to-live expiration for sessions/tokens, append-only recommendation snapshots.

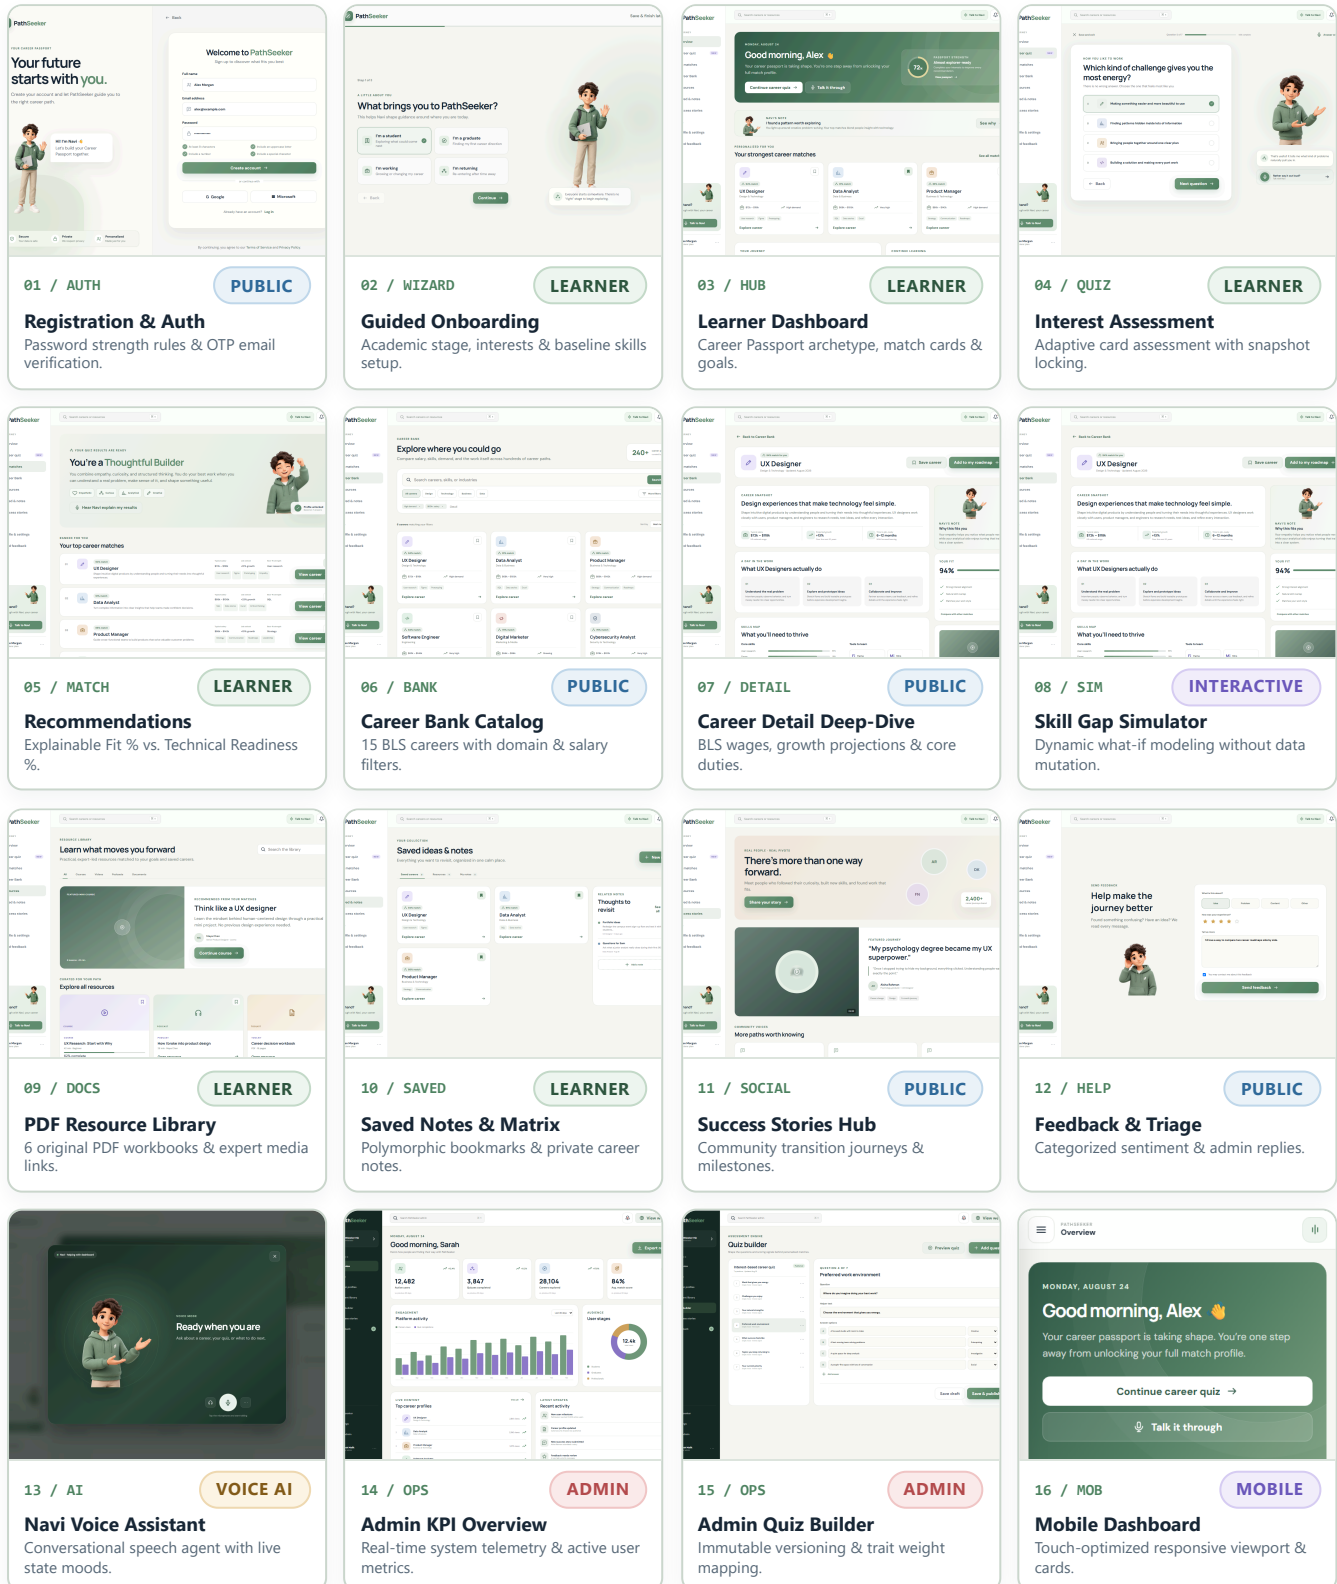

End-to-End Request Lifecycle

- 1User Action:** Learner selects an answer choice in the career assessment or adjusts a skill slider.
- 2API Dispatch:** TanStack Query mutation fires with JSON payload and active session credentials.
- 3Protection & Auth:** Express middleware verifies CSRF/CORS, rate limits, and decodes opaque session cookie.
- 4Service Execution:** Controller delegates to domain service which performs deterministic calculation and updates MongoDB.
- 5State Reconciliation:** Fresh data payload returns to browser, triggering query cache invalidation and toast alert.

APPLICATION SCOPE & SCALE

Complete Product Map: 16 Core Web Experiences

A high-density visual index of all 16 primary responsive web modules implemented across PathSeeker, communicating production completeness across public, learner, and administrative subsystems.

ENTRY EXPERIENCE

Welcome, Authentication & Guided Onboarding

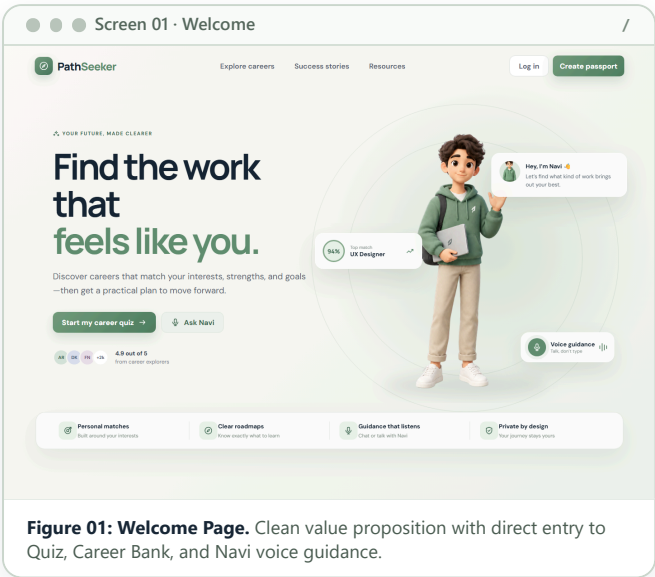

Figure 01: Welcome Page. Clean value proposition with direct entry to Quiz, Career Bank, and Navi voice guidance.

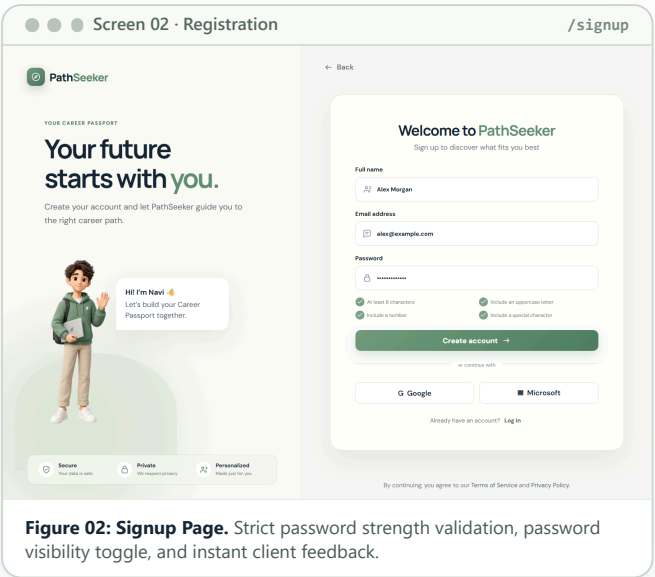

Figure 02: Signup Page. Strict password strength validation, password visibility toggle, and instant client feedback.

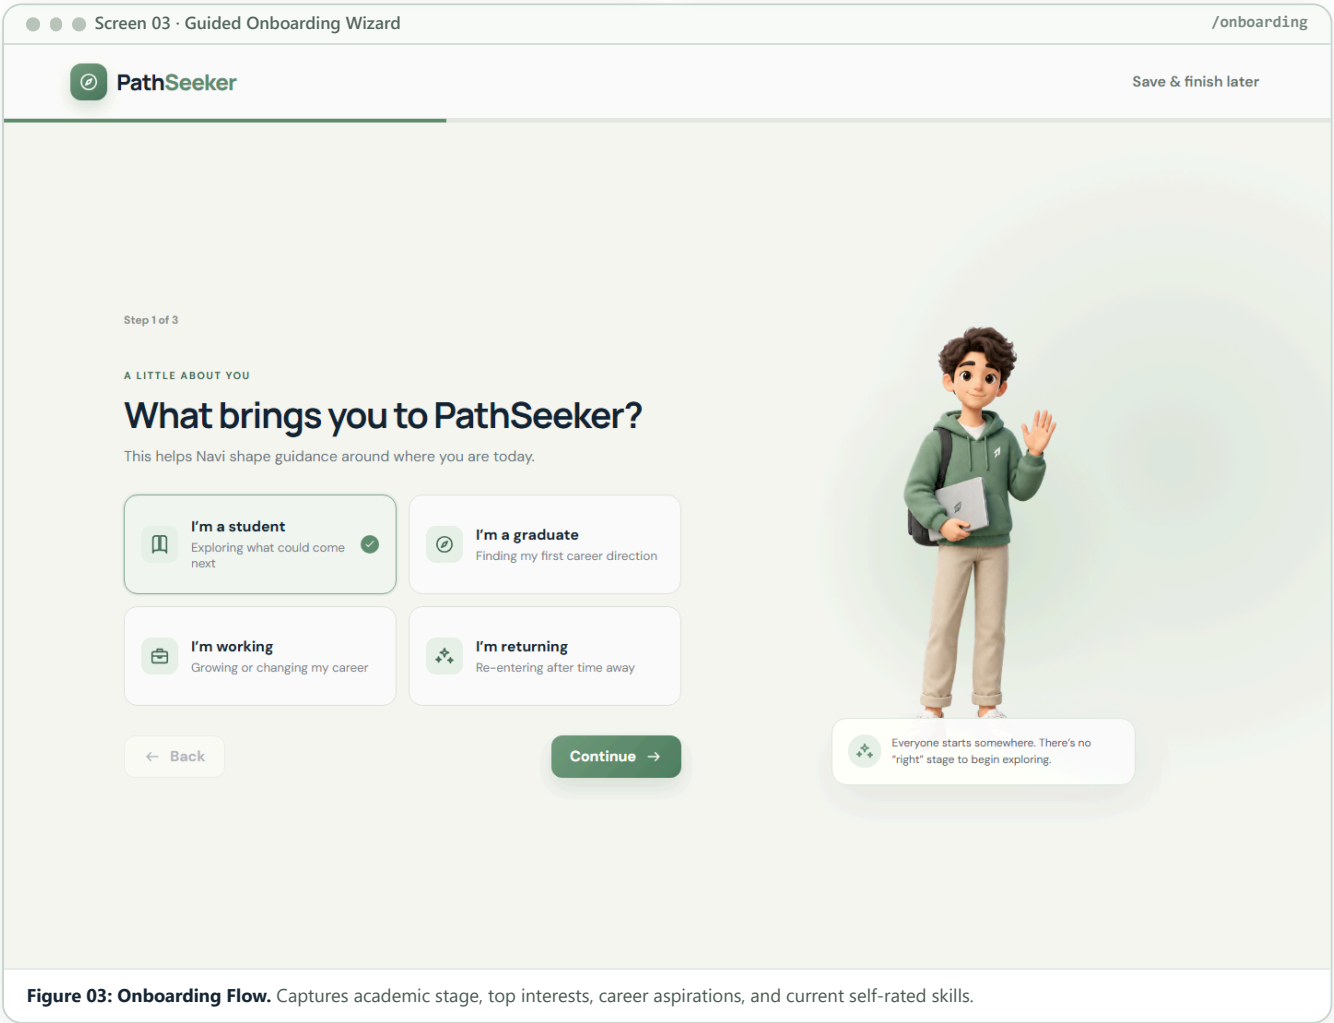

Figure 03: Onboarding Flow. Captures academic stage, top interests, career aspirations, and current self-rated skills.

Security Invariants

Passwords are hashed using bcrypt with salt rounds = 12. Email verification OTPs use single-use cryptographic tokens with a 15-minute expiry.

Onboarding Progression

Step-by-step state saved in session storage allowing learners to complete onboarding seamlessly even after page refreshes.

LEARNER COMMAND CENTER

Personalized Dashboard & Career Passport

The primary learner landing experience synthesizes assessment traits, top recommendations, weekly learning milestones, and bookmark shortcuts into an actionable Career Passport.

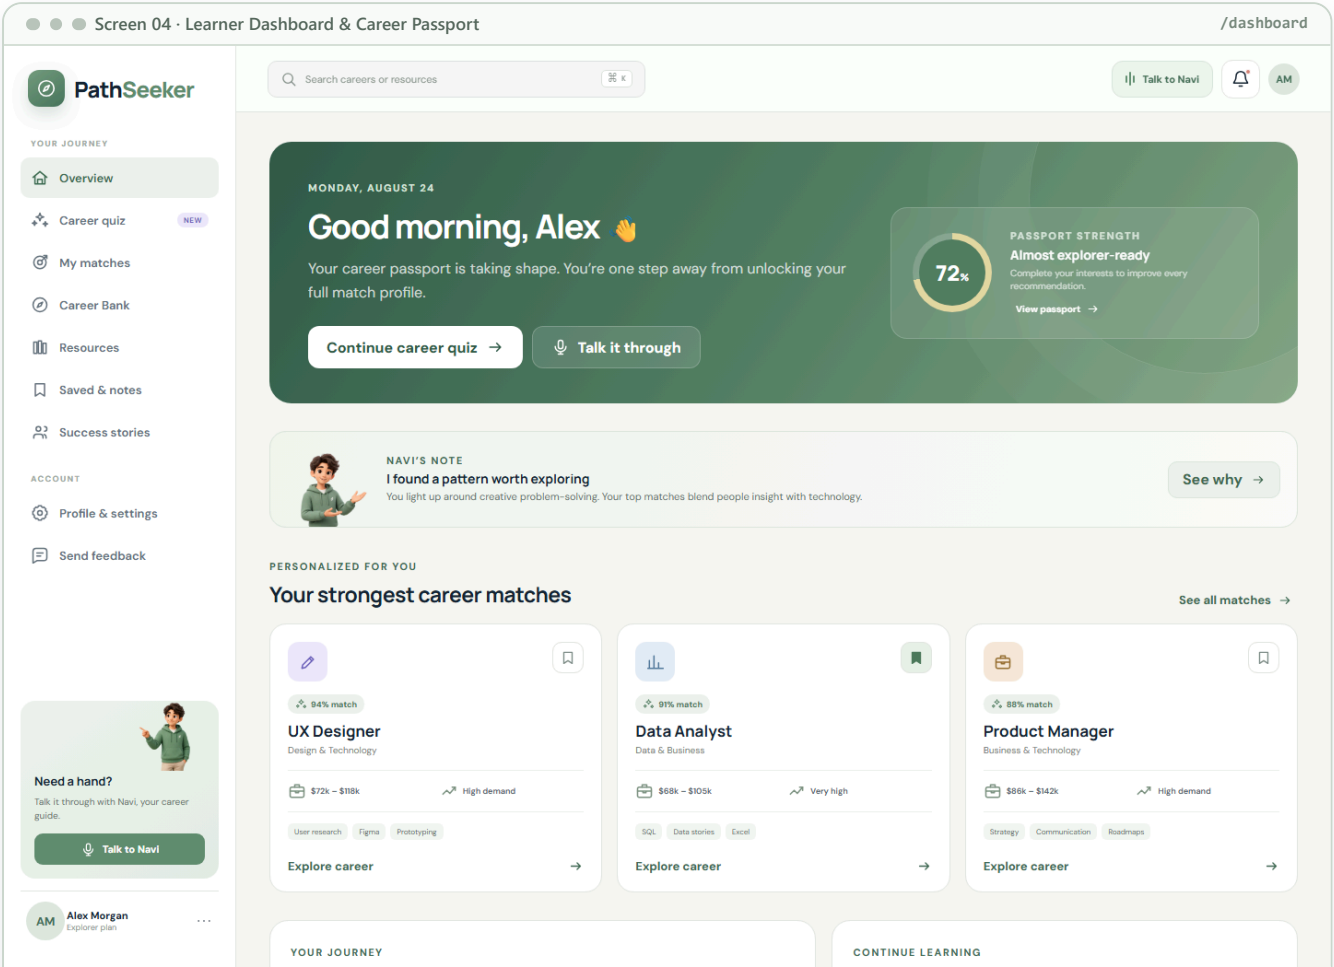

Figure 04: Learner Dashboard & Career Passport. High-impact overview showing the student's primary archetype ("Insight Explorer"), 71% profile evidence signal, top career recommendations, weekly study tracker, and quick action cards.

Career Passport Archetype

Categorizes learners into 6 distinct behavioral archetypes (e.g. *Insight Explorer*, *Imaginative Builder*) based on dominant trait vectors.

Evidence Signals (7 Milestones)

Calculates a transparent 0–100% completion score across education, skills, interests, goals, quiz attempts, bookmarks, and notes.

Instant Recommendations

Surfaces top 3 career pathways with compatibility percentages and direct one-click links to deep-dive roadmaps and skill simulators.

PSYCHOMETRIC DISCOVERY & MATCH ENGINE

Interest Assessment & Recommendations Explorer

PathSeeker separates assessment into two distinct phases: taking the snapshot-locked psychometric assessment and exploring mathematically explainable recommendations.

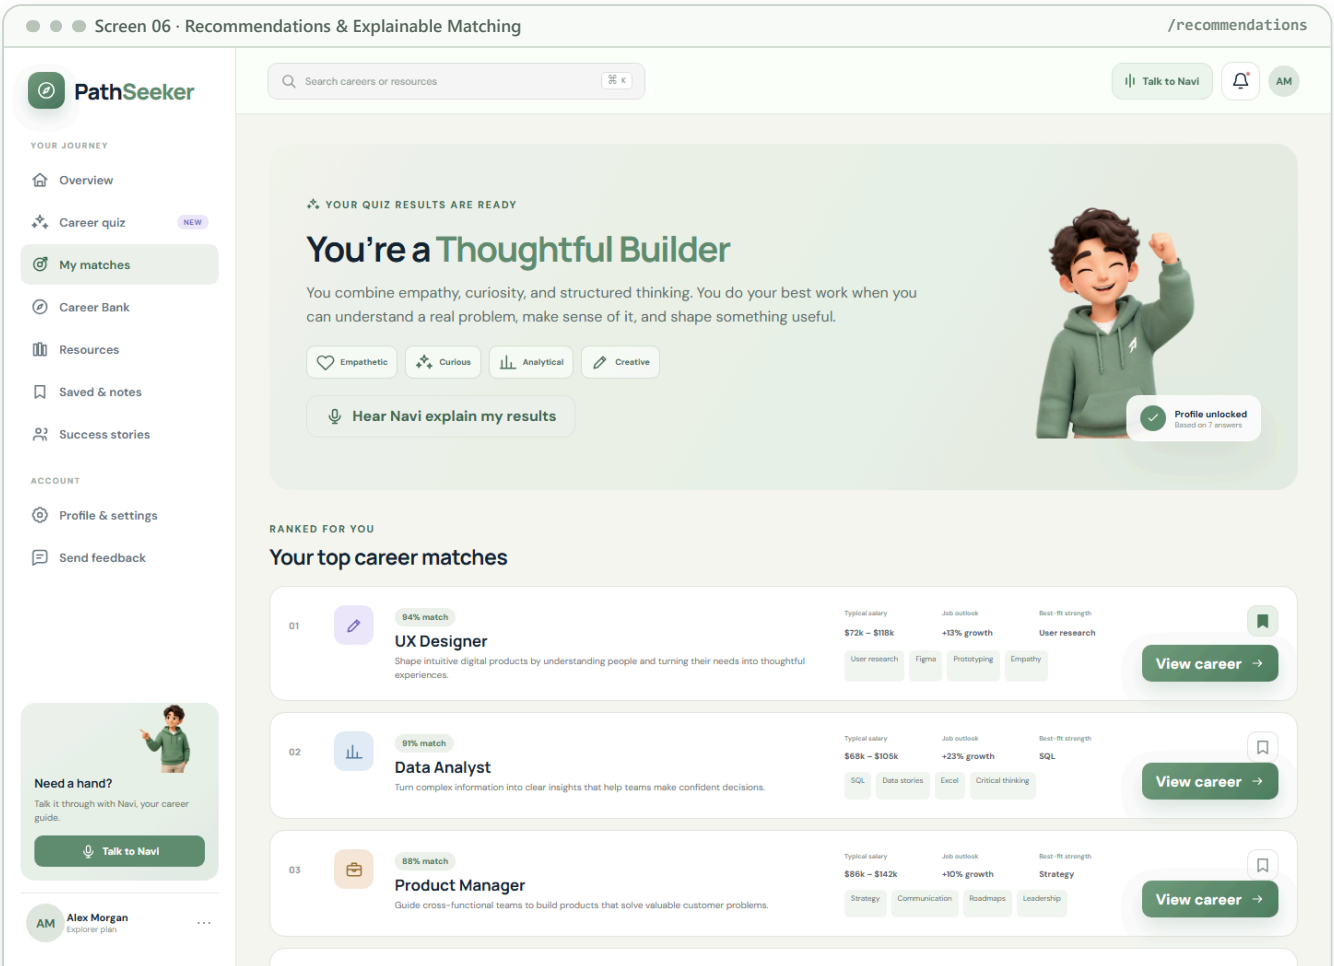

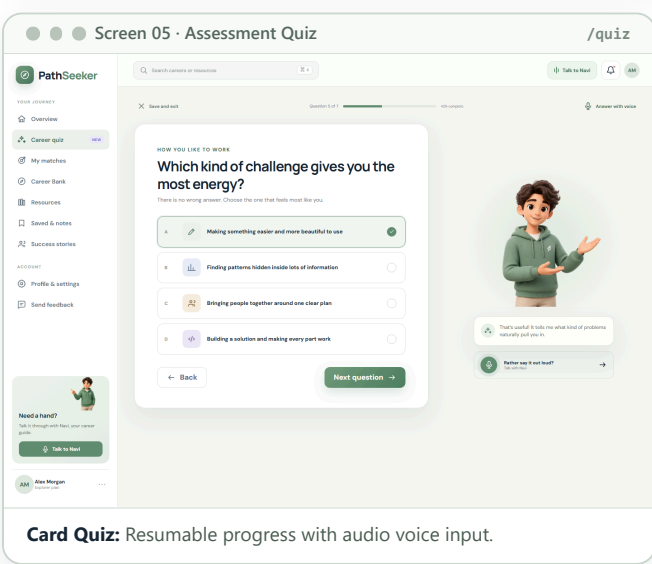

Figure 05: Recommendations Explorer. High-legibility showcase displaying ranked career cards with dual Compatibility % vs. Readiness % metrics, exact match factors, and missing skill badges.

Card Quiz: Resumable progress with audio voice input.

Snapshot Integrity & Versioning

Assessment attempts create frozen records in MongoDB linking the active question version. Content editors can update future quiz questions without mutating or invalidating historical student results.

IMMUTABLE AUDIT TRAIL

OCCUPATIONAL CATALOG & SIMULATION

Career Bank, Deep Detail & Skill Simulator

Comprehensive occupational intelligence powered by U.S. Bureau of Labor Statistics data (2024–2034) featuring an interactive skill simulator for real-time what-if modeling.

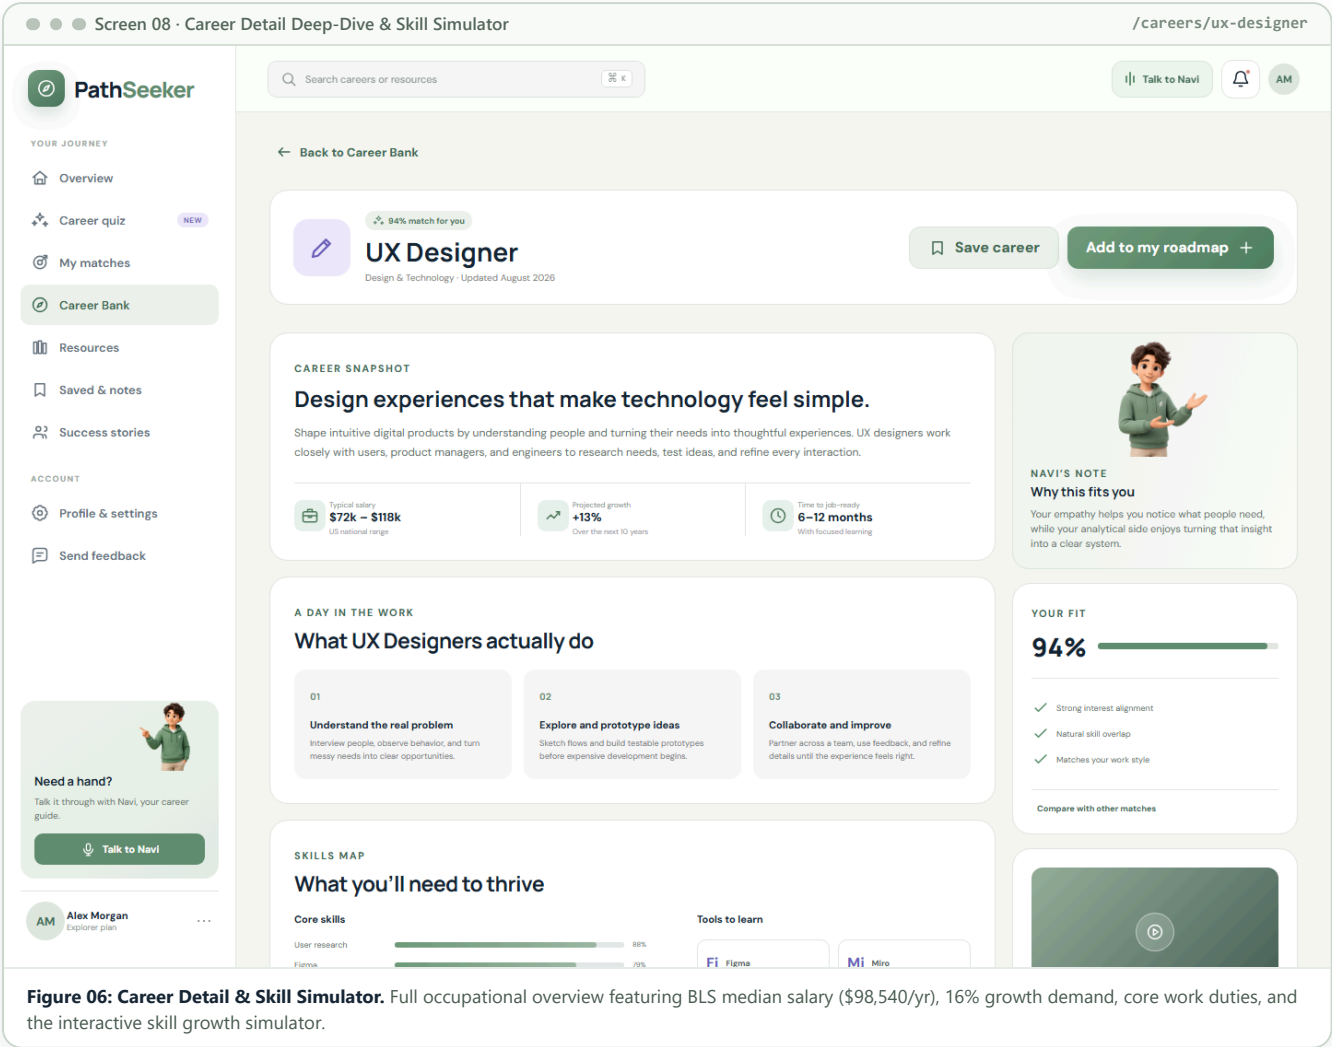

Figure 06: Career Detail & Skill Simulator. Full occupational overview featuring BLS median salary (\$98,540/yr), 16% growth demand, core work duties, and the interactive skill growth simulator.

BLS Occupational Data

Median annual wages, 10-year growth percentages, entry education levels, and on-the-job training requirements sourced from BLS 2024–2034.

Stateless Skill Simulator

Learners adjust skill sliders to immediately observe recalculated readiness without altering their verified profile records (persisted: false).

Multi-Facet Career Bank

Filterable by domain, salary brackets (\$50k–\$150k+), growth rate, education level, and required skill tags across 15 sourced careers.

LEARNING CENTER

Curated PDF Resources, Expert Media & Notes

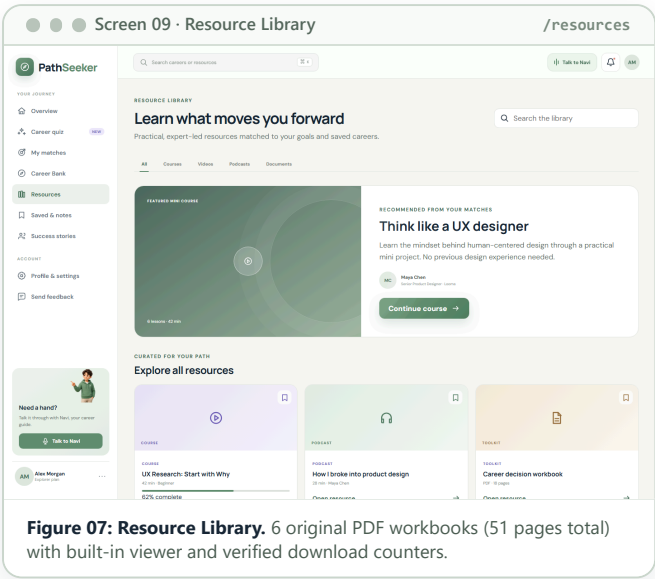

Figure 07: Resource Library. 6 original PDF workbooks (51 pages total) with built-in viewer and verified download counters.

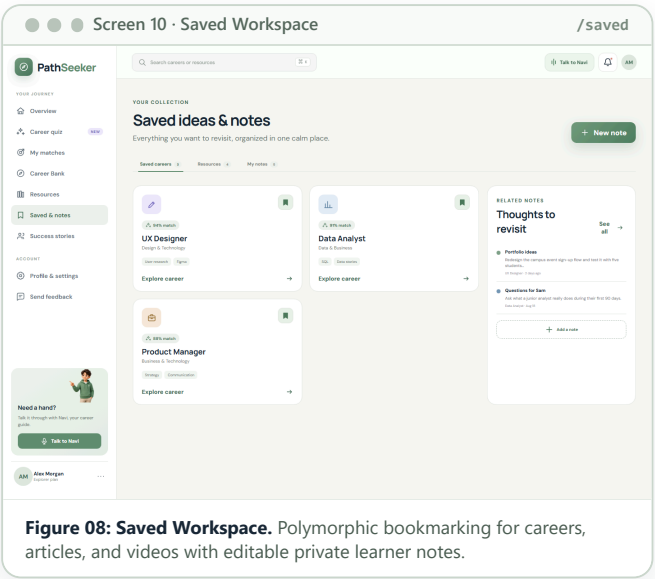

Figure 08: Saved Workspace. Polymorphic bookmarking for careers, articles, and videos with editable private learner notes.

Resource Verification & Provenance Matrix

RESOURCE TITLE	FORMAT	PAGES / DURATION	AUDIENCE & PURPOSE
Career Transition Roadmap Workbook	Original PDF	12 Pages	Action planning, milestone scheduling, and risk mitigation.
Tech Resume & Portfolio Builder	Original PDF	8 Pages	Structuring developer/designer portfolios and GitHub repos.
A Day in the Life: UX Designer	Expert Video	14 mins	Google Career Certificates overview of daily design sprints.
Demystifying Cloud Engineering	Expert Video	18 mins	Industry overview of cloud architecture and AWS/GCP certs.

COMMUNITY & CONTINUOUS IMPROVEMENT

Success Stories Hub & Learner Feedback

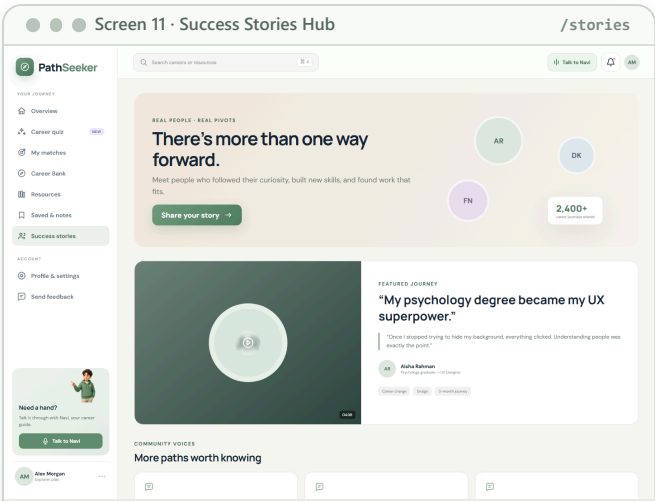

Figure 09: Success Stories. Inspiring transition journeys submitted by community members with domain tags and milestone timelines.

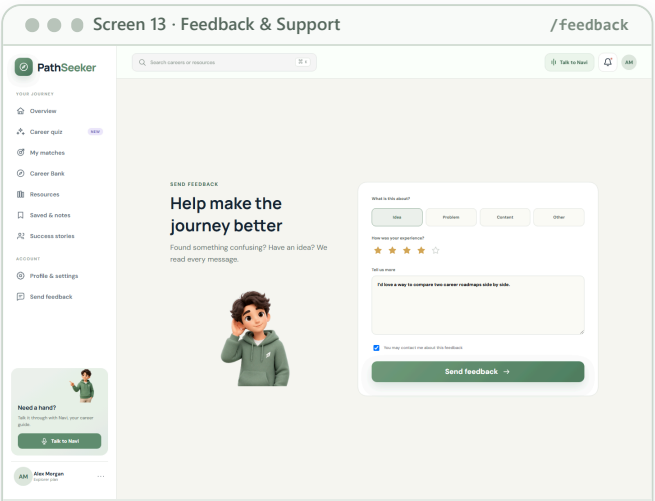

Figure 10: Feedback Modal. Star ratings, categorized sentiment (Bug, Suggestion, Praise), and admin response tracking.

Story Moderation Lifecycle

Draft → Submitted → Under Staff Review → Approved / Changes Requested → Published. Ensures all public stories meet community safety guidelines.

Feedback Triage Loop

Submissions appear in admin queue. When staff replies, the user receives an in-app notification and can view the resolution directly.

CONVERSATIONAL GUIDANCE

Navi Assistant & Voice Guidance Mode

An interactive guidance character with full voice interaction, animated contextual moods (Listening, Thinking, Speaking), and automatic deep-route navigation.

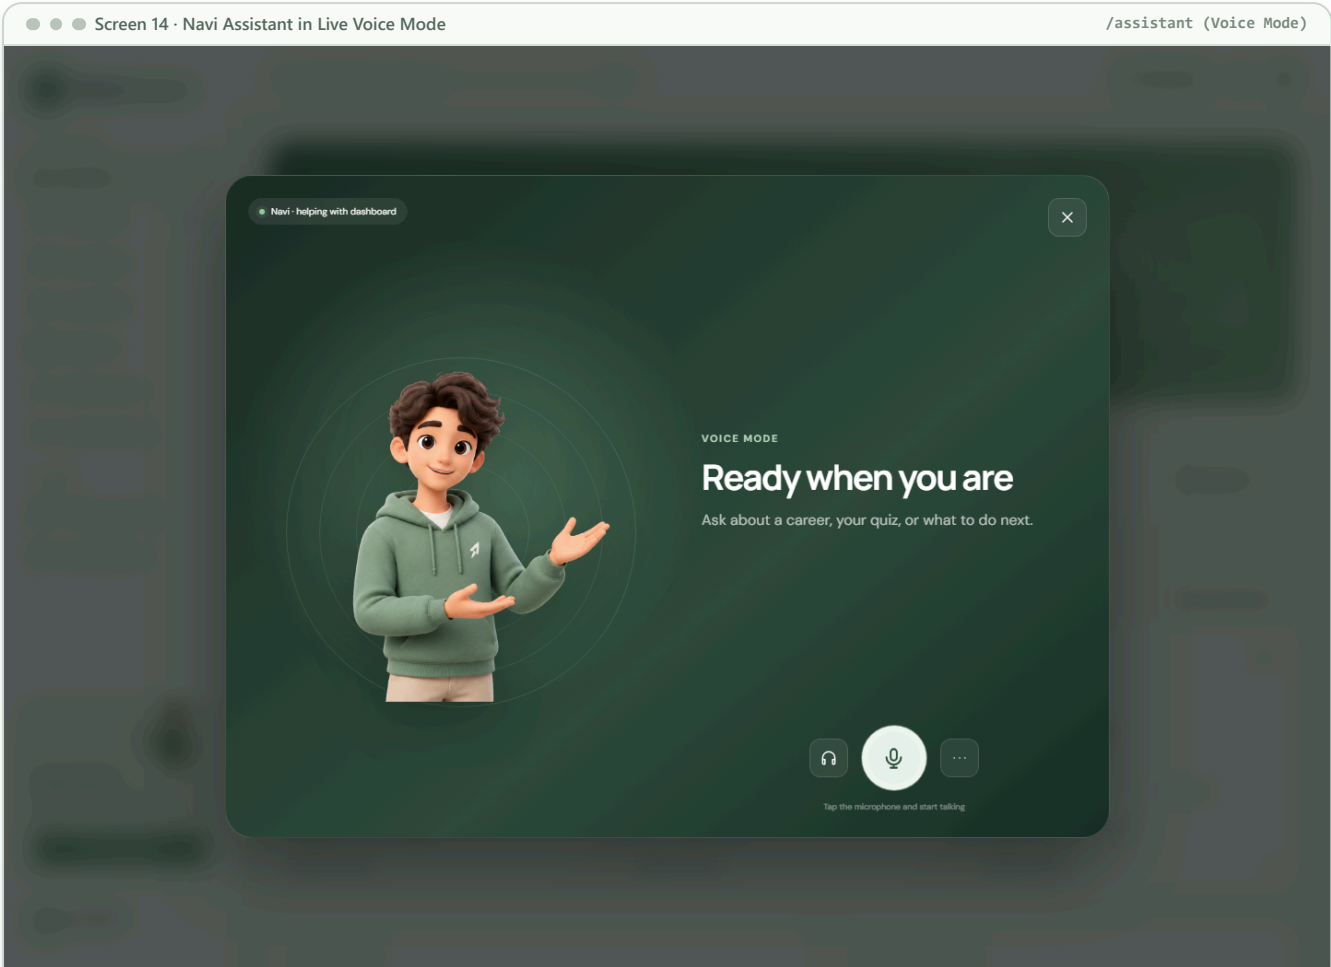

Figure 11: Navi AI Assistant in Voice Guidance Mode. Full-screen voice dialog featuring reactive mood visualizers, real-time speech synthesis, intent detection, and automated in-app screen redirection.

Intent Detection & Navigation

Understands queries like "What careers fit creative thinkers?" or "Show me Cloud Architect salaries" and automatically deep-links to the exact view.

Conversational Mutations

Allows learners to add skills to their profile, adjust career goals, or bookmark resources conversationally with session verification.

Vapi & Local Fallback

Connects to Vapi WebSockets for high-speed voice streaming when configured, with robust browser Web Speech API fallback.

OPERATIONS & GOVERNANCE

Admin Control Center & Management Workspaces

A full administrative subsystem providing 6 dedicated control modules for catalog management, user role governance, quiz versioning, story moderation, feedback triage, and system telemetry.

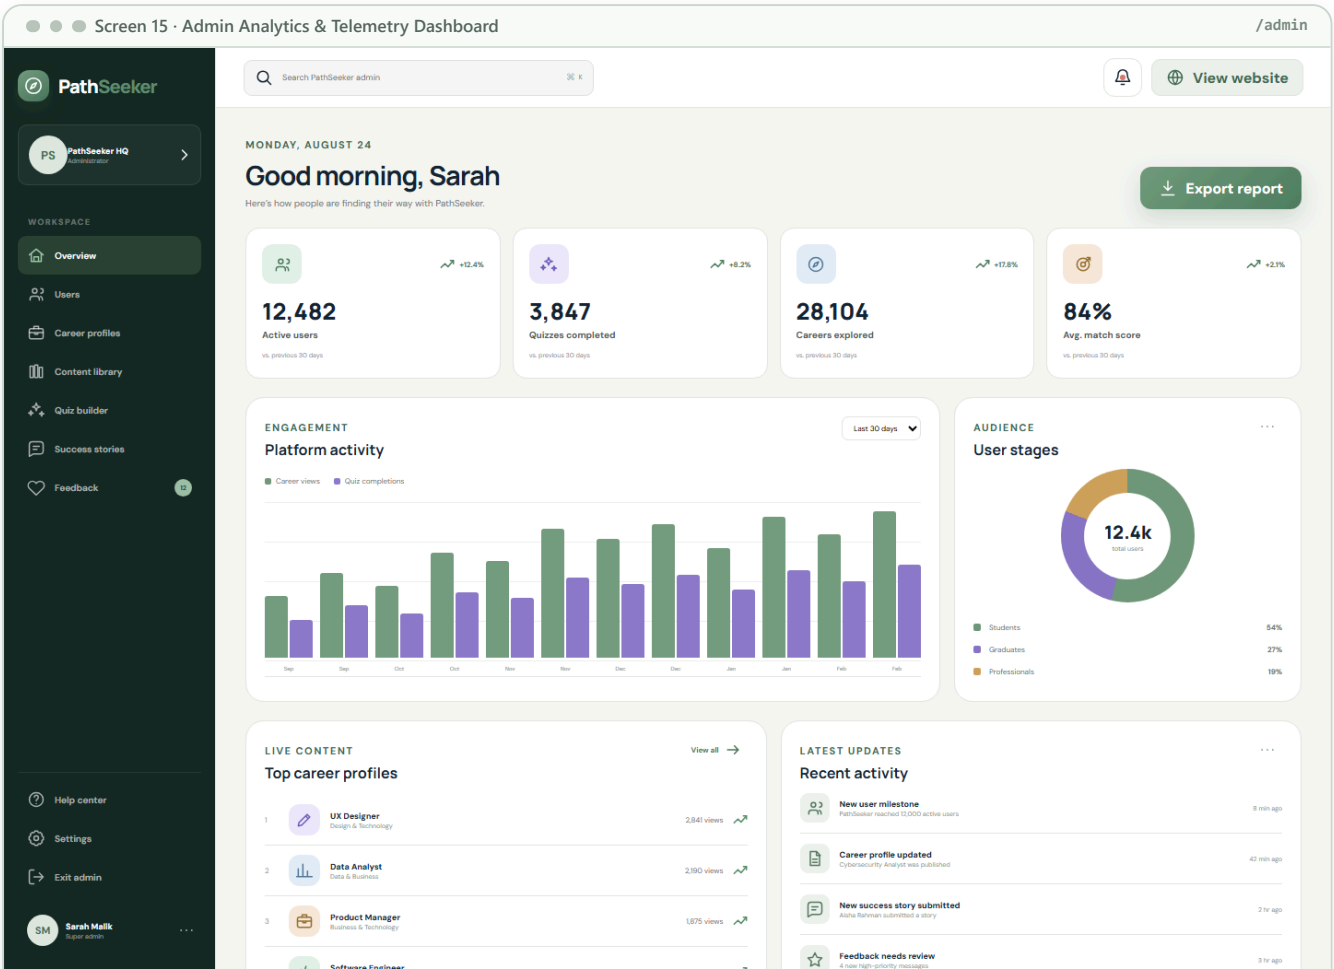

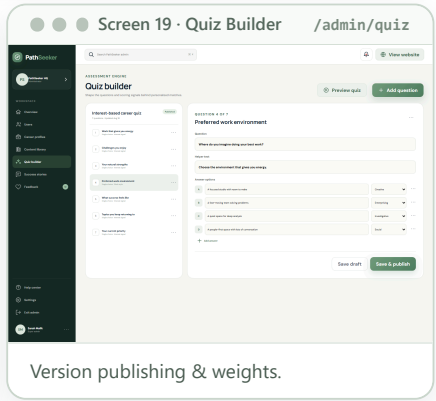

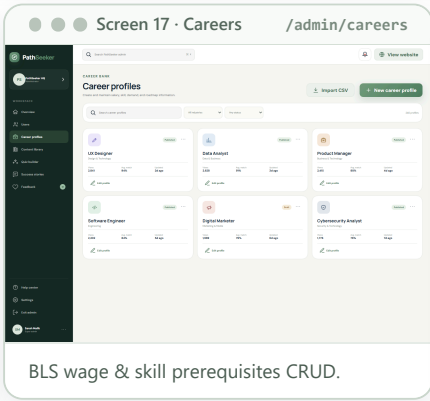

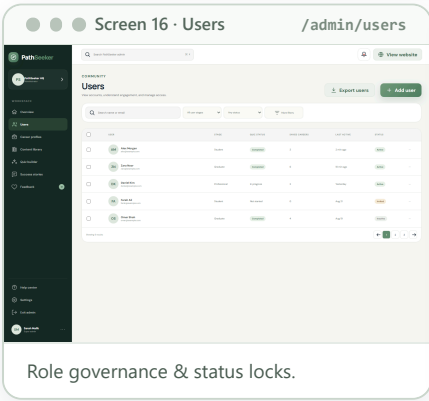

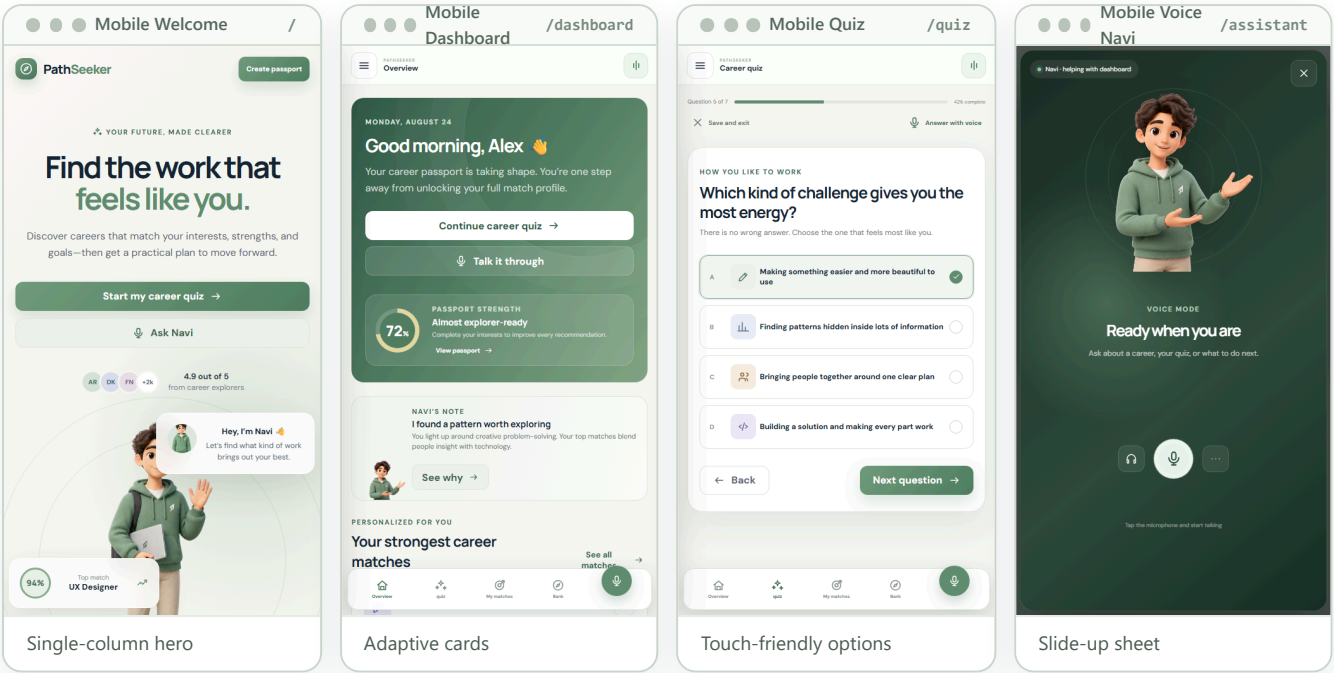

Figure 12: Admin Dashboard. Real-time operational KPIs covering 30-day active learners, completed assessments, career views, feedback triage queue, and system health status.

INCLUSIVE PRESENTATION

Responsive Viewports & Accessibility Tokens

Accessibility Compliance Highlights

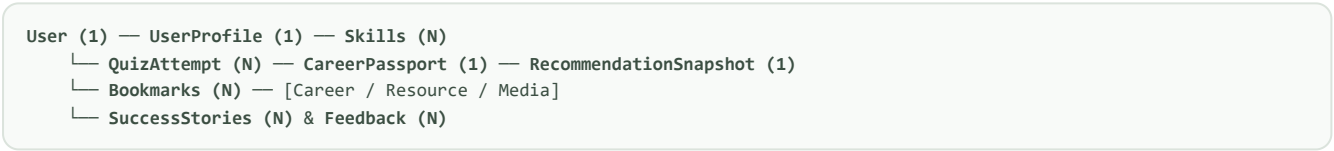

FEATURE	IMPLEMENTATION DETAILS	STANDARD MET
Dynamic Font Scaling	Custom scale slider adjusting base tokens from 85% to 130% without layout breakage.	WCAG 2.1 AA (1.4.4)
Reduced Motion	Honors prefers-reduced-motion media query; disables intense animations.	WCAG 2.1 AAA (2.3.3)
Keyboard Navigation	Visible focus indicators (:focus-visible), skip links, and ARIA dialog traps.	WCAG 2.1 AA (2.1.1)
Contrast Ratios	Sage/Navy palette engineered to exceed 4.8:1 contrast for normal body text.	WCAG 2.1 AA (1.4.3)

DATABASE DESIGN

MongoDB Collections & Relational Integrity

COLLECTION / MODEL	KEY FIELDS & DATA TYPES	INDEX & INTEGRITY CONSTRAINTS
User	_id, name, email, passwordHash, role, stage, status, isVerified, lastLoginAt	Unique sparse index on normalized email. Password excluded by default.
UserProfile	userId, headline, educationLevel, skills[{skillId, level}], interests[], goal	1:1 relation to User. Indexed on userId. References Skill catalog.
Career	slug, title, domainId, summary, salaryMedian, growthOutlook, requiredSkills[], published	Unique on slug. Compound text search on title, summary, tags.
CareerPassport	userId, attemptId, archetype, traits{}, domainScores{}, completionScore, version	Unique per attempt. Time-indexed on createdAt for historical progression.
RecommendationSnapshot	passportId, recommendations[{careerId, matchScore, readinessScore, reasons[]}]	Immutable append-only record linking exact scores to assessment snapshot.
Bookmark	userId, itemType, itemId, personalNote, createdAt	Compound unique index on (userId, itemType, itemId).

Relational Entity Flow

DETERMINISTIC SCORING

Passport Calculation & Recommendation Engine

1. Career Passport Scoring Formulas

```
TraitScore(T) = (SelectedOptionCount(T) / MaxPossibleOptions(T)) * 100
DomainScore(D) = (AccumulatedDomainWeight(D) / MaxPossibleDomainWeight(D)) * 100
CompletionScore = (PresentProfileSignals / 7) * 100
```

2. Career Match & Readiness Formulas

```
Compatibility% = (TraitAlignment * 0.55) + (InterestAffinity * 0.25) + (SkillOverlap * 0.20)
Readiness% = WeightedAverage( min(1.0, UserSkillLevel(s) / RequiredSkillLevel(s)) )
ConfidenceScore = 55 + min(40, TotalEvidenceDataPoints * 4)
```

Compatibility (Fit)

Reflects how naturally the user's personality traits and intrinsic interests match the daily realities of the career.

Readiness (Preparedness)

Evaluates technical mastery across critical, important, and nice-to-have skill prerequisites (0–10 scale).

Skill-Gap Priority

Calculated as: Gap * ImportanceWeight * 20, automatically sorting which competencies the learner must prioritize.

Stateless Simulation Invariant: Simulator calculations occur on-the-fly and return persisted: false, guaranteeing that experimenting with skills never corrupts verified learner records.

HTTP API & HARDENING

Endpoints & Threat Mitigation Matrix

Core Endpoints

ROUTE	METHOD	SCOPE
/api/auth/register	POST	Public
/api/auth/login	POST	Public
/api/users/me/dashboard	GET	Authenticated
/api/users/me/passport	GET	Authenticated
/api/quiz-attempts	POST/GET	Authenticated
/api/careers	GET	Public
/api/resources/:id/download	GET	Authenticated
/api/admin/users	GET/PATCH	Admin Role

Threat Mitigation Matrix

THREAT	DEFENSIVE CONTROL
XSS / Token Theft	Opaque session ID in HttpOnly, SameSite=Lax, Secure cookie; tokens unreadable by JavaScript.
Brute Force	Strict Express rate limiters on /api/auth/* and /api/assistant/*.
Privilege Escalation	Authoritative requireRole('admin') middleware verified on every server request.
NoSQL Injection	Mongoose schema typing + sanitization of query parameters.

ENGINEERING EXCELLENCE

Why PathSeeker Stands Out: Core Technical Differentiators

PathSeeker rejects marketing superficiality in favor of verifiable software engineering rigor. Below are the 8 architectural and functional differentiators that set PathSeeker apart from standard student projects.

1. Explainable Dual-Metric Intelligence

SCORING ENGINE

Traditional tools conflate interest with qualification. PathSeeker decouples **Compatibility %** (intrinsic behavioral & psychological fit) from **Readiness %** (immediate prerequisite mastery), explaining exactly *why* a role is recommended.

Formula: $(\text{Trait} \times 0.55) + (\text{Interest} \times 0.25) + (\text{Skill} \times 0.20)$

2. Immutable Assessment Snapshots

DATA INTEGRITY

Assessment attempts freeze question text, option choices, and trait weights at the exact time of submission. Admins can update future question banks without corrupting or invalidating historical student records.

Model: `QuizAttemptSchema.attemptSnapshot` (ReadOnly)

3. Stateless Interactive Skill Simulator

SIMULATION

Enables learners to test "What-if" skill growth scenarios in real time. Calculations execute dynamically on the client and server returning persisted: `false`, preventing accidental data pollution.

Endpoint: `POST /api/careers/:id/simulate` (Ephemeral)

4. Navi Conversational Voice AI Mode

VOICE AGENT

Full hands-free conversational agent supporting real-time voice speech synthesis, intent detection, animated mood visualizers (Listening, Thinking, Speaking), and automatic application deep-linking.

Stack: Vapi WebSockets + Web Speech API fallback

5. BLS-Backed Occupational Rigor

AUTHENTIC DATA

Zero generic placeholder careers. All 15 occupational profiles incorporate authentic U.S. Bureau of Labor Statistics (2024–2034) median wage percentiles, 10-year growth demand, and education prerequisites.

Source: U.S. Bureau of Labor Statistics (2024–2034)

6. WCAG 2.1 AA/AAA Accessibility

INCLUSIVITY

Engineered for all learners: theme switching (Sage Light / Forest Dark), fluid font scaling (85%–130%), prefers-reduced-motion compliance, visible focus rings, and ARIA dialog modal traps.

Standard: WCAG 2.1 AA/AAA Compliant Tokens

7. Comprehensive 6-Module Admin Center

GOVERNANCE

Production-ready governance: User role management, career catalog editor, immutable quiz version publishing, success story moderation workflow, feedback triage queue, and system audit logs.

Scope: 6 Dedicated Workspaces with Role Guards

8. 47 Passing Automated Tests & Zero Lints

RELIABILITY

Verified through 36 backend integration and unit test suites plus 11 frontend test suites, 0 ESLint errors, strict Zod schema validation, and complete reproducibility across all environments.

Evidence: 36 Backend + 11 Frontend Suites Passed

EVALUATOR RUNBOOK

Deployment Instructions & Formal Approval

Quick Start Commands

```
# 1. Start Backend API & Seed Database
cd Project/backend1
npm ci ; npm run seed ; npm start

# 2. Start Frontend Client
cd ../frontend
npm ci ; npm run dev

# Seeded Accounts (Common Password: PathSeeker-Demo-2026!):
# • Super Admin: admin@pathseeker.local
# • Student: demo.student@pathseeker.local
# • Graduate: demo.graduate@pathseeker.local
# • Professional: demo.professional@pathseeker.local
```

Evaluator Deliverables

- ✓ Complete source code repository
- ✓ Verified database seed package
- ✓ Full-coverage documentation (HTML & MD)
- ✓ 25 high-resolution screenshot proofs

Project Summary

PathSeeker delivers on all SRS mandates with architectural elegance, mathematical transparency, high visual craft, and rigorous security.

Formal Approval & Evaluation Sign-Off
