

PATHSEEKER CAREER PASSPORT

Skills Gap Analysis and Practice Template

Translate a target role into evidence you already have, gaps that matter, and deliberate practice you can schedule.

BEST FOR

Any explorer preparing for a specific role, internship, promotion, or career transition.

FORMAT

7-page reusable template - write directly on a printed copy or duplicate the prompts into your notes app.

Discover what fits you best - then test it with evidence.

01 - SCOPE

Define the target role

Analyze one role family and market at a time. Similar titles can have very different expectations.

Target title, location or remote market, and employer type...

Ten job descriptions sampled and date collected...

02 - BASELINE

Rate skill and evidence separately

Confidence is not evidence. Rate current ability and proof as separate dimensions.

Evidence scale

0 = none; 1 = practice exercise; 2 = completed project; 3 = reviewed work used by someone or measured against a standard.

03 - REFRAME

Inventory transferable evidence

Prior work, volunteering, study, and life experience may contain relevant evidence even when the title is different.

The strongest transferable story I can tell...

04 - FOCUS

Prioritize the right gaps

Prioritize gaps that are frequent, important, and possible to demonstrate. Do not spend equal time on every missing keyword.

	High / Med / Low			
	High / Med / Low			
	High / Med / Low			
	High / Med / Low			

The one gap that unlocks the most opportunities...

05 - PRACTICE

Design deliberate practice

A practice task should resemble the target work, include feedback, and produce evidence.

- ☐ The task uses realistic constraints.
- ☐ I can explain the quality standard.
- ☐ A person or test will provide feedback.
- ☐ The result can be shown without violating privacy.
- ☐ The scope fits the deadline.

06 - SCHEDULE

Run a six-week sprint

Schedule output and feedback, not just course consumption.

Important

Career requirements, salaries, and hiring practices vary by country, city, employer, experience, and economic conditions. Use occupational data as a research starting point, not a promise of employment or pay.
